# Introduction

Sustainability is becoming increasingly important, with its impact evident across various industrial, food, and vital sectors both globally and locally. In alignment with Saudi Arabia's Vision 2030 and the global shift towards a more sustainable environment, Amiantit Group continues its leadership journey in achieving a balance between industrial development and environmental preservation.

Amiantit is committed to providing sustainable solutions that meet future needs in building a green, carbon-free society. Through the development of eco-friendly products and the digitization of operational processes, Amiantit aims to solidify its position as a provider of sustainable solutions in water, infrastructure, and non-metallic industries.

## Environmental Sustainability

Reducing Carbon Emissions and Increasing Afforestation

Amiantit has planted thousands of trees of species that absorb significant amounts of carbon and store it, contributing to reducing CO<sub>2</sub> emissions and having a long-term positive impact on climate.

Annual projects are implemented to support the goals of Saudi Vision 2030, focusing on improving energy efficiency and reducing carbon footprints.

### Eco-Friendly Products

Amiantit offers a diverse range of non-metallic products that are sustainable, recyclable, and highly efficient in reducing resource consumption.

The company focuses on developing carbon-free solutions used in infrastructure and water projects, reinforcing its role in reducing industrial environmental impact.

### Enhancing Energy Efficiency

Expanding the use of renewable energy sources in manufacturing processes and operational facilities.

Implementing advanced technologies to reduce electricity consumption and enhance sustainability.

## Sustainable Water Management

Amiantit is committed to developing sustainable water treatment technologies, including desalination, wastewater treatment, and water reuse in industrial and agricultural sectors.

The company's solutions help conserve water resources and reduce waste, supporting long-term water security both locally and globally.

## Digitalization & Smart Transformation

Amiantit has adopted a comprehensive strategy for digitizing operations to enhance efficiency, reduce waste, and lower resource consumption.

AI and IoT-based systems are utilized to monitor processes and optimize environmental performance.

Smart solutions are implemented to improve product quality while minimizing environmental impact.

## **Environmental, Social, and Governance (ESG) Compliance**

Amiantit adheres to high standards of transparency and accountability across all its operational and administrative activities.

Ensures compliance with local and global environmental regulations to enhance sustainability.

Promotes a culture of sustainability within the company through training programs and awareness initiatives for employees.

# Community Investment and Social Responsibility

Amiantit supports employment and training programs to empower youth and enhance local competencies.

Participates in environmental and social initiatives aimed at raising environmental awareness within the community.

Provides educational support programs in collaboration with universities and research institutions to develop sustainable solutions in water and energy sectors.

## Innovation, Research, and Development

Amiantit invests in research and development centers to ensure the continuous delivery of eco-friendly industrial solutions.

The company is working on developing new materials and technologies to improve resource efficiency and reduce environmental impact.

Collaborates with global and local research institutions to explore future technologies in water, energy, and sustainable infrastructure.

## Environmental Compliance & Regulations

Amiantit has obtained global environmental certifications, affirming its commitment to international environmental standards.

Advanced environmental monitoring systems are implemented to ensure compliance with environmental laws.

Proactive measures are taken to minimize negative environmental impacts and enhance sustainability throughout production stages.

# Future Sustainability Vision

Continues adopting the latest technologies to enhance resource efficiency and achieve a balance between industrial development and environmental sustainability.

Developing long-term plans to reduce carbon emissions and innovate sustainable solutions in the water sector.

Supporting national and international environmental initiatives and actively contributing to the achievement of Saudi Vision 2030's sustainability goals.

## Conclusion

Amiantit Group believes that sustainability is not just an option but a shared responsibility that everyone must uphold to ensure a more sustainable future for generations to come. By continuing to develop sustainable products, digitizing operations, and enhancing water solutions, Amiantit maintains its leading role in building a greener, more efficient world in alignment with Saudi Arabia's Vision 2030.
